

Commercial | Healthcare | Government | Correctional

Security Communication Solutions for Multiple Industries. All Sizes.

Offering an array of access control, communication, and emergency products designed to keep buildings and occupants secure.

Save with Centralized Security

With our access control and IP intercom systems, one person can control visitor access and monitor activity across an entire business campus. Regardless of building sizes—or the distances between them—you can connect virtually every building together.

Reduce, Avoid, and Eliminate Hidden Fees

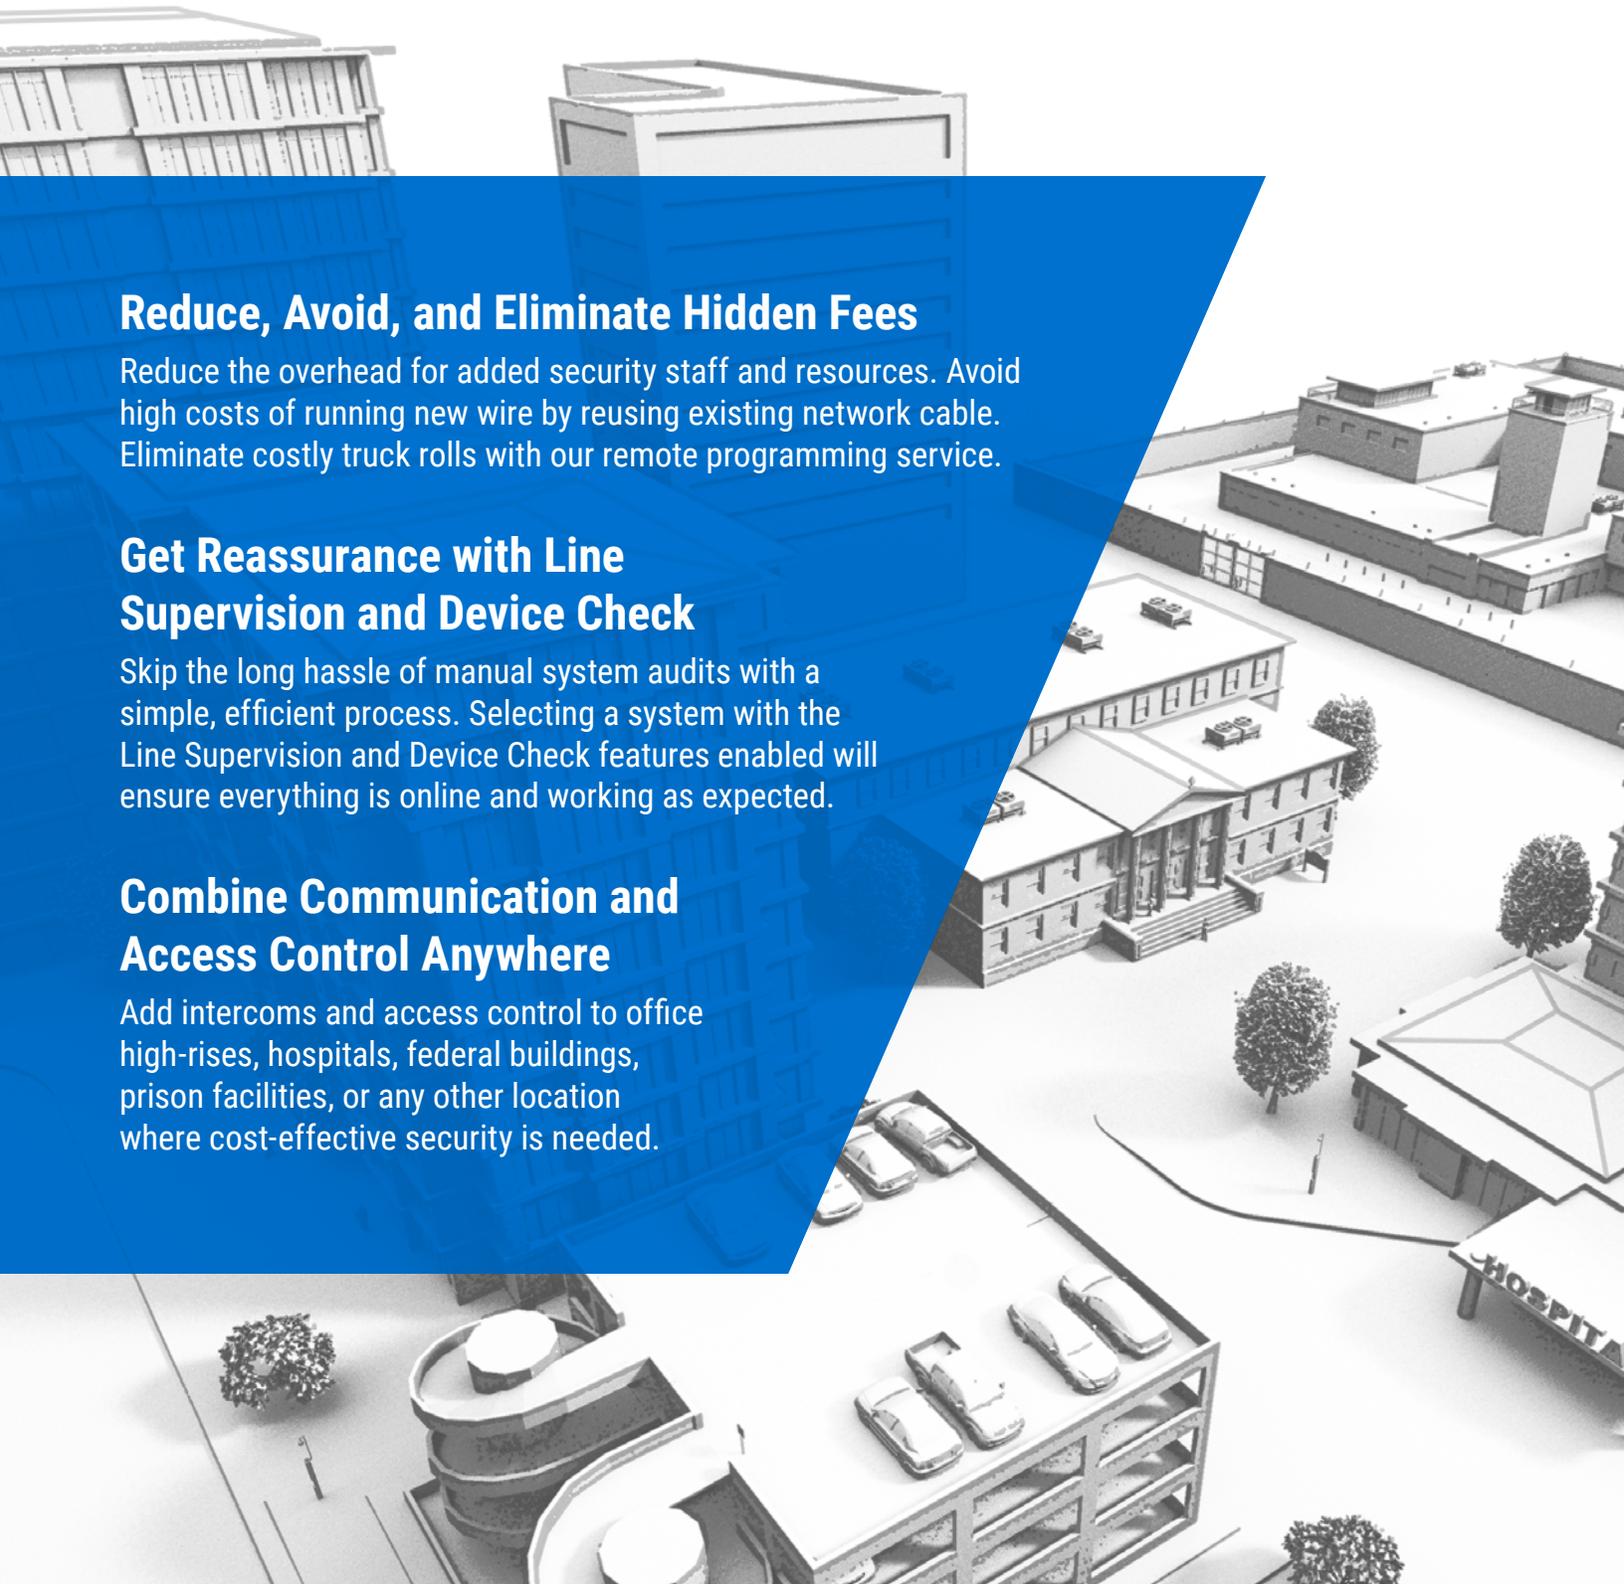

Reduce the overhead for added security staff and resources. Avoid high costs of running new wire by reusing existing network cable. Eliminate costly truck rolls with our remote programming service.

Get Reassurance with Line Supervision and Device Check

Skip the long hassle of manual system audits with a simple, efficient process. Selecting a system with the Line Supervision and Device Check features enabled will ensure everything is online and working as expected.

Combine Communication and Access Control Anywhere

Add intercoms and access control to office high-rises, hospitals, federal buildings, prison facilities, or any other location where cost-effective security is needed.

Combine Access Control with Door Stations

- Install door stations to provide calling points for visitors at locked entrances
- Protect interior locations with access control, such as equipment rooms or restricted areas
- Select card reader stations to provide personnel with a convenient method to quickly enter buildings they are authorized to access

Empower Office Staff with Master Stations

- Clearly identify visitors and determine their intent before unlocking the door
- Monitor activity throughout entire building or campus
- Use as visitor management
- Record calls to a removable SD card
- Immediately call other offices or buildings with two-way communication
- Make paging announcements or broadcast emergencies
- Use alerts for routine notifications and unpredictable events

Respond and Reach with Audio Room Sub Stations

- Answer calls and pages from main office/reception
- Reach security staff from any connected station
- Have open or private conversations

Provide Help Points with ADA-Compliant Emergency Stations

- Get immediate help with emergency calling
- Dual-button stations available for general and emergency calls
- Choose your preferred mounting solution: flush/surface mount or mount into emergency wall boxes/towers

Secure Remote Areas with Wall Boxes and Emergency Towers

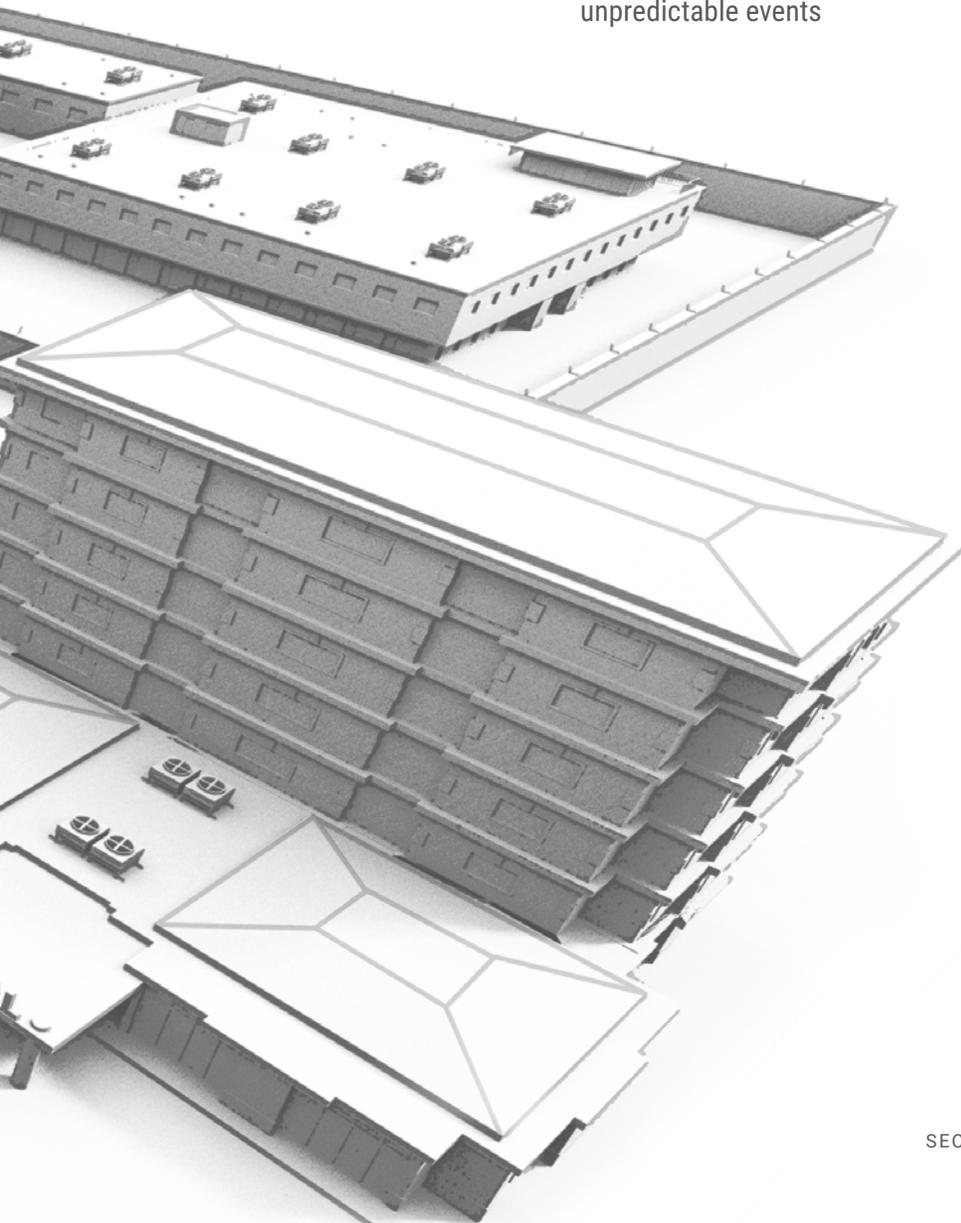

- Parking lots and garages
- Stairwells and hallways
- Any area where trouble might lurk
- Deter prowlers with highly visible emergency towers
- Provide personnel and visitors help points across large grounds

Integrate for a Comprehensive Security Solution

- Use your PA system for all pages, alerts, and bell notifications to be clearly heard throughout your building/campus
- Capture a wide view of the situation with network camera integration
- Log activity for more accurate and detailed record-keeping

Need proof a visitor was at your building? Save images to an NVR and reference them later if evidence is needed.

Commercial Industry

OFFICE HIGH-RISES | BUSINESS PARKS | CORPORATE CAMPUSES

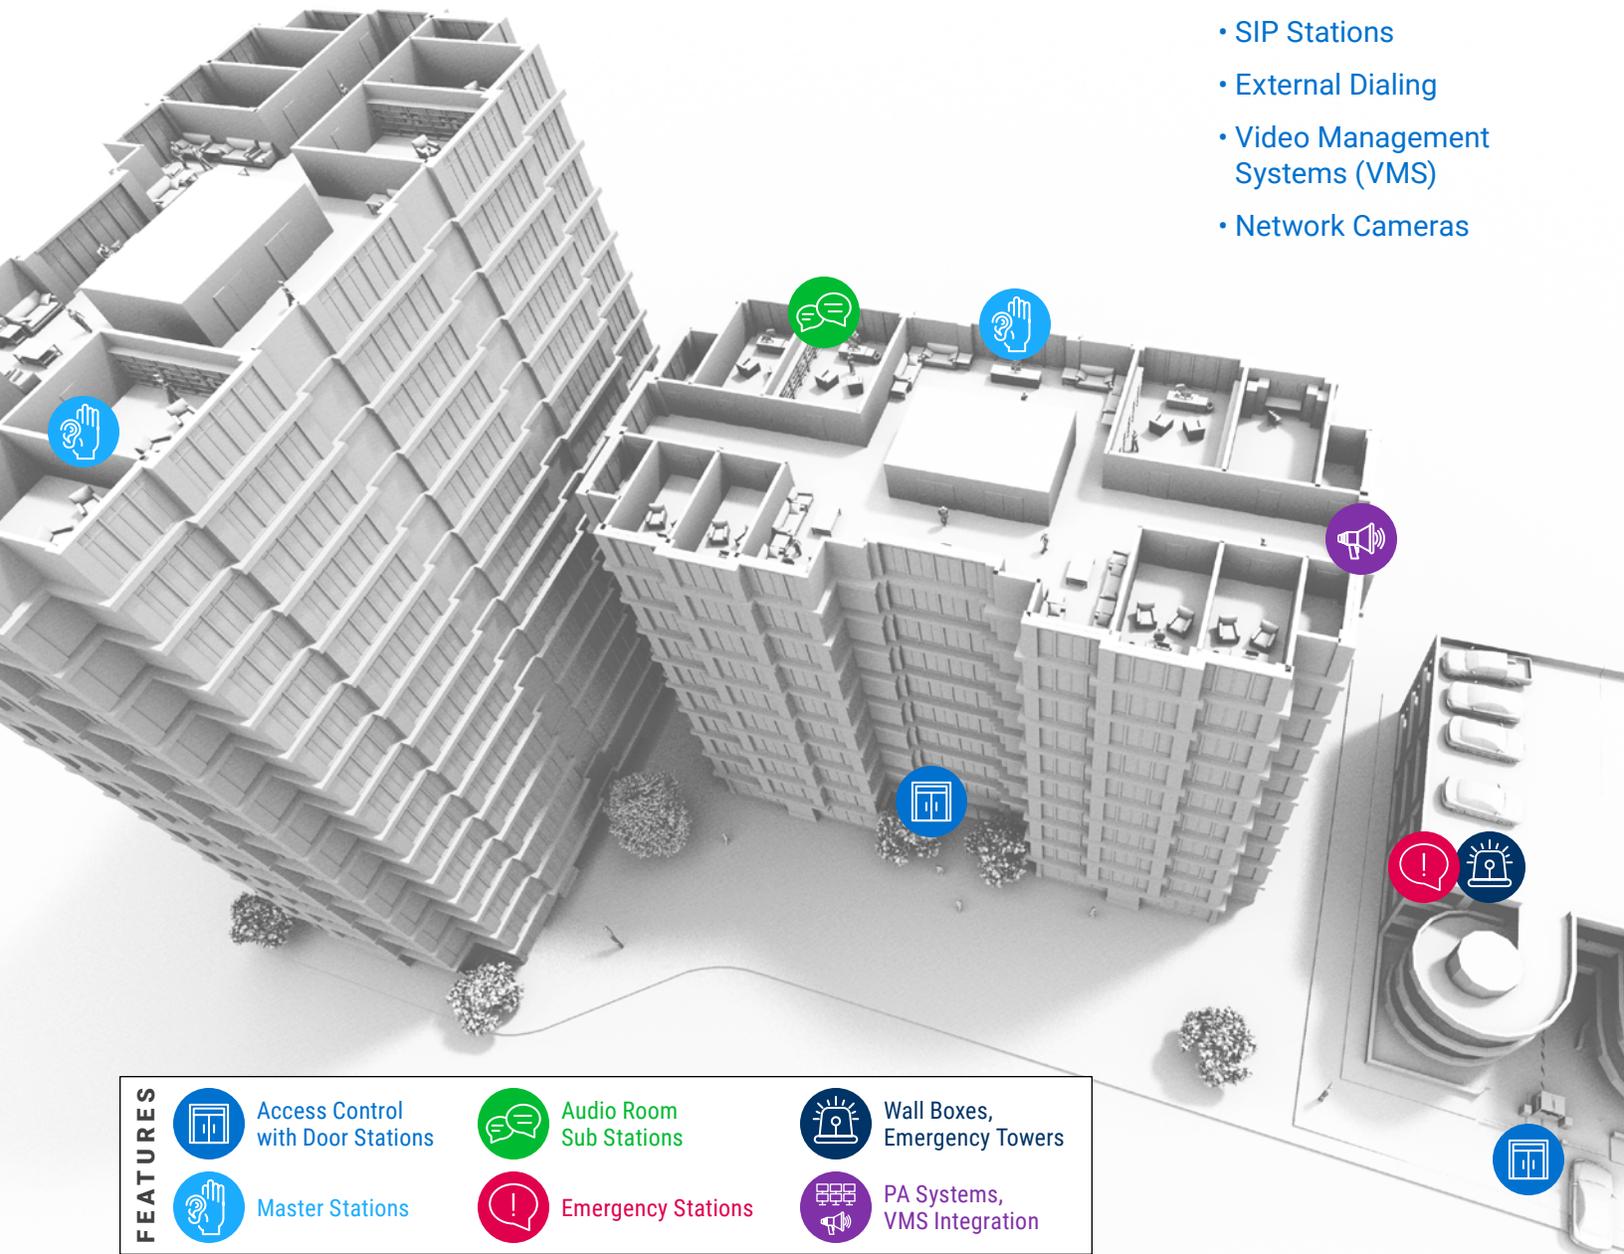

Design the Ultimate Command Center

With the numerous ways select Aiphone systems can integrate, you can create a powerful security operations center. When your emergency staff becomes overwhelmed, calls can be forwarded directly to a call center. If you need 24/7 streaming video recorded to an NVR, totally doable. And with the flexibility to start small and expand at any time, you'll have the freedom to buy only what is needed, when it's needed—the system scales at your pace.

Secure and monitor multiple buildings across your corporate campus with:

- Access Control
- SIP Stations
- External Dialing
- Video Management Systems (VMS)
- Network Cameras

FEATURES	 Access Control with Door Stations	 Audio Room Sub Stations	 Wall Boxes, Emergency Towers
	 Master Stations	 Emergency Stations	 PA Systems, VMS Integration

Healthcare Industry

HOSPITALS | ASSISTED-LIVING | PHARMACIES

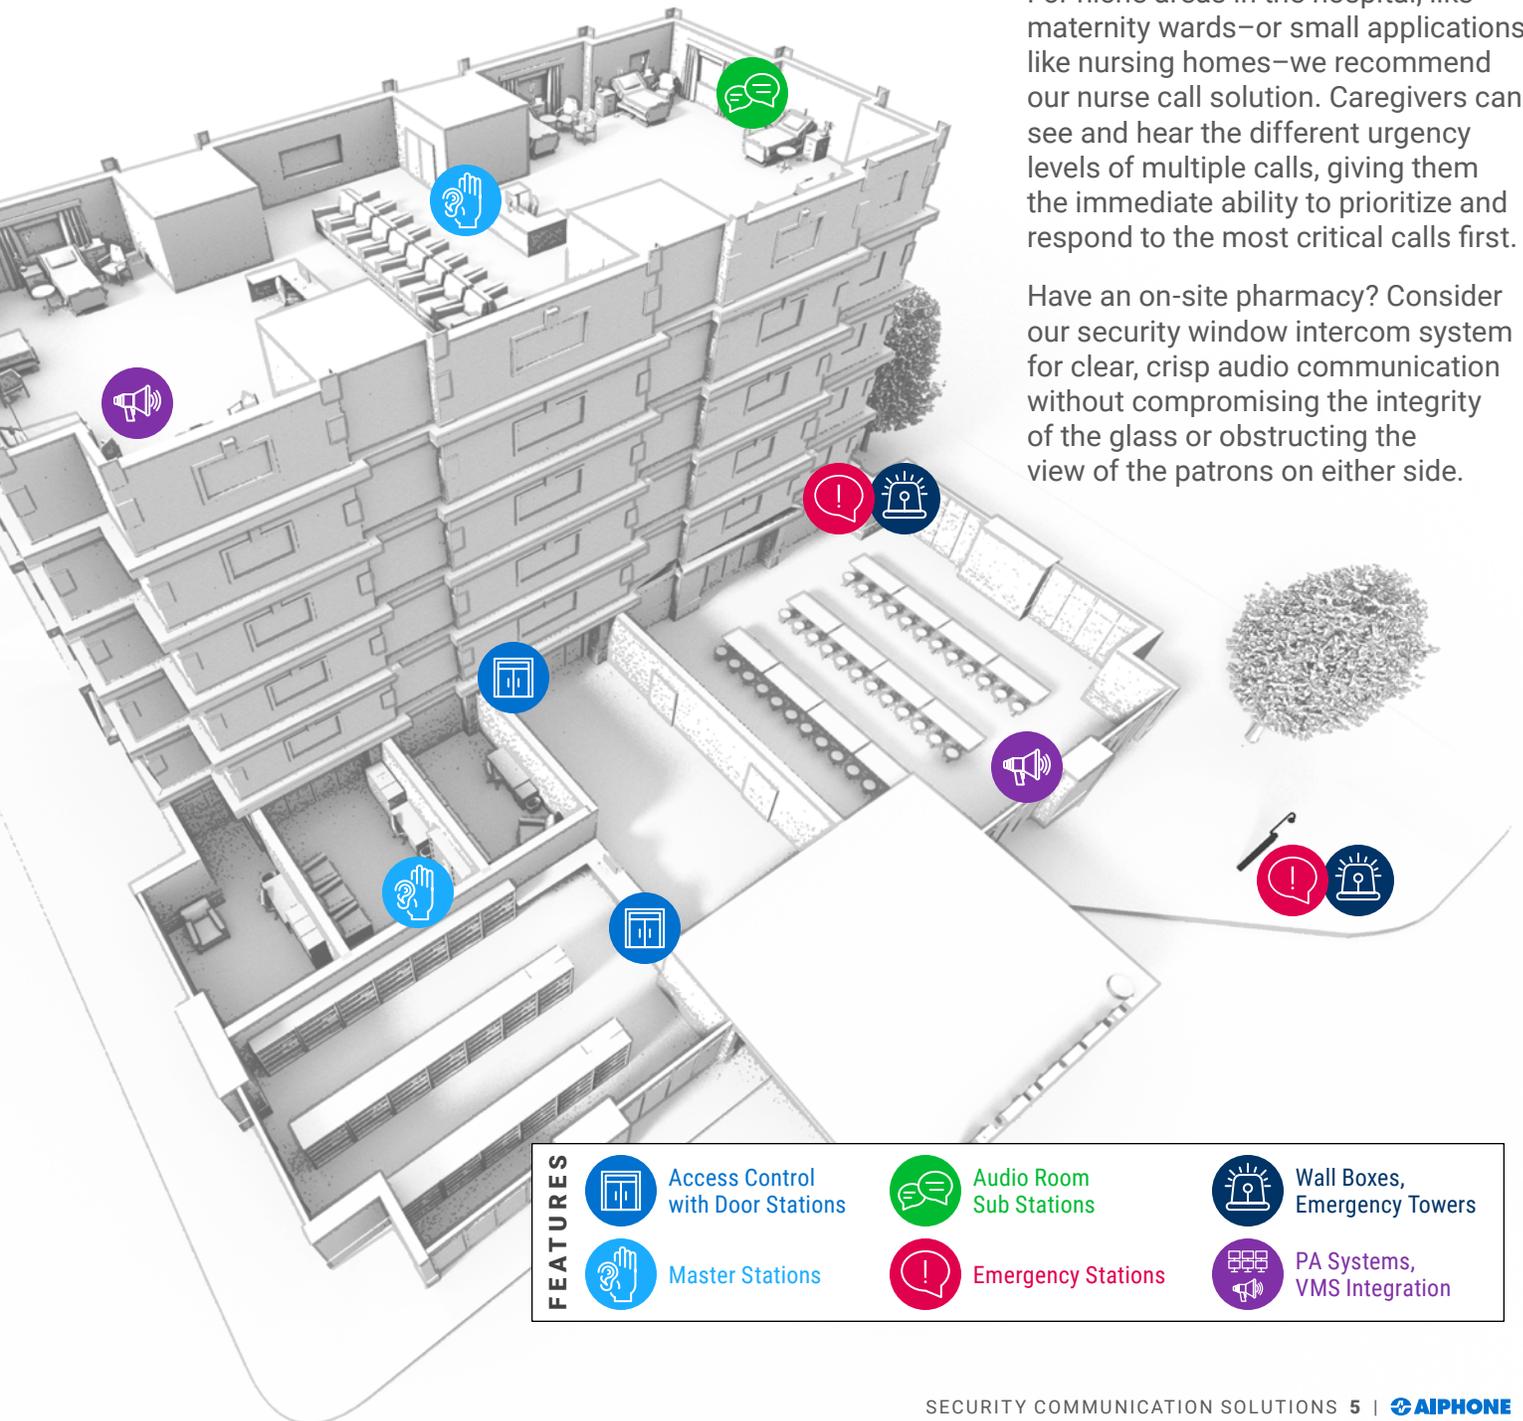

Save Time and Sustain High-Quality Care

Ensure patients and residents have vital access to their nursing staff. With room-to-room communication and emergency calling options, help can be reached at any time.

Access control and video door stations prevent unauthorized access into secured areas, helping to protect sensitive locations or rooms that require additional screening.

For niche areas in the hospital, like maternity wards—or small applications like nursing homes—we recommend our nurse call solution. Caregivers can see and hear the different urgency levels of multiple calls, giving them the immediate ability to prioritize and respond to the most critical calls first.

Have an on-site pharmacy? Consider our security window intercom system for clear, crisp audio communication without compromising the integrity of the glass or obstructing the view of the patrons on either side.

Government Industry

COURTHOUSES | AIRPORTS | MILITARY FACILITIES

Protect Government Agencies with a Wide Range of Solutions

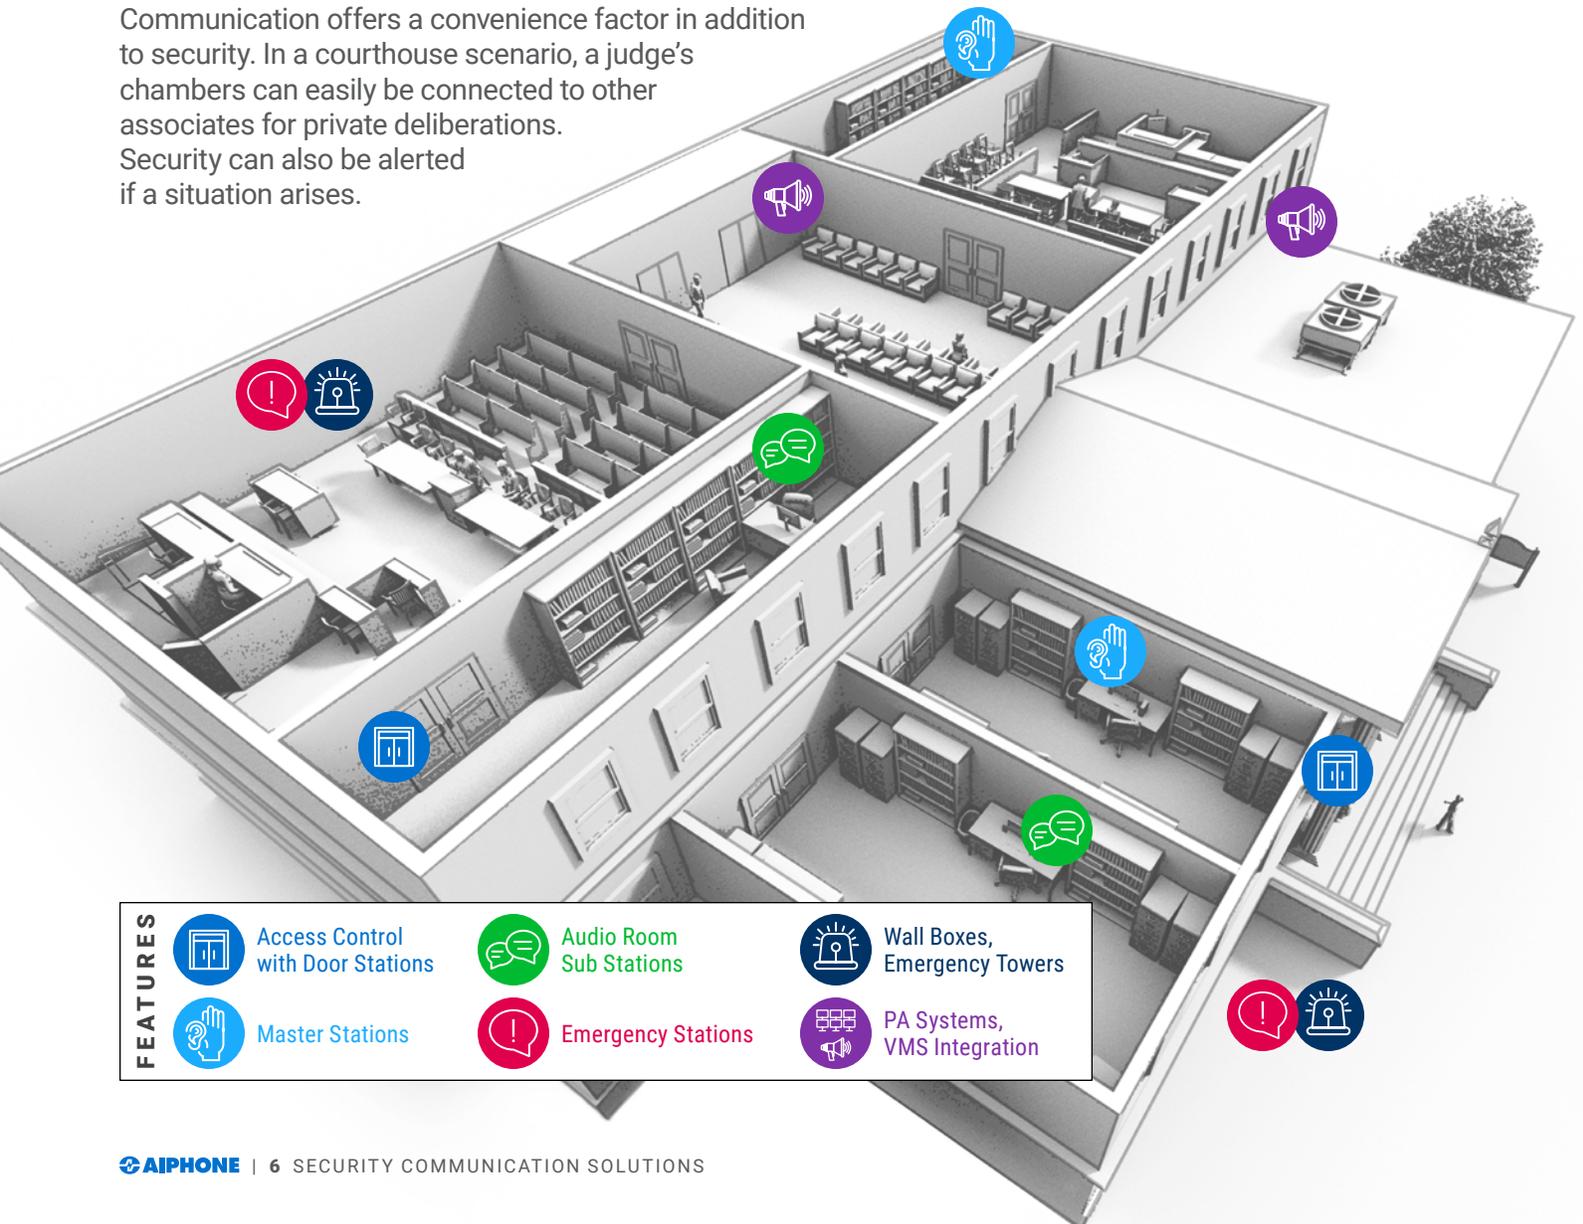

The nature of work conducted in certain government buildings may make them a target for foreign or domestic threats. This potential risk makes alerting and internal communication critical in the case of an emergency.

Multiple buildings can be simultaneously notified of any suspicious activity at once. Keep your patrons informed of any serious problems or threats as they occur, greatly reducing the negative impact these situations could inflict.

Communication offers a convenience factor in addition to security. In a courthouse scenario, a judge's chambers can easily be connected to other associates for private deliberations. Security can also be alerted if a situation arises.

For crowded facilities, like airports, clear communication helps passengers to their destinations. If a gate changes or an announcement is broadcast, hearing the message clearly is important for travelers. Crisp, audible stations—paired with amplified speakers—will ensure announcements are heard even in the noisiest of environments.

Aiphone solutions are ideal for recruitment centers. Our reliable products provide controlled access and visitor screening for a single office and for locations serving multiple branches within a complex.

Correctional Industry

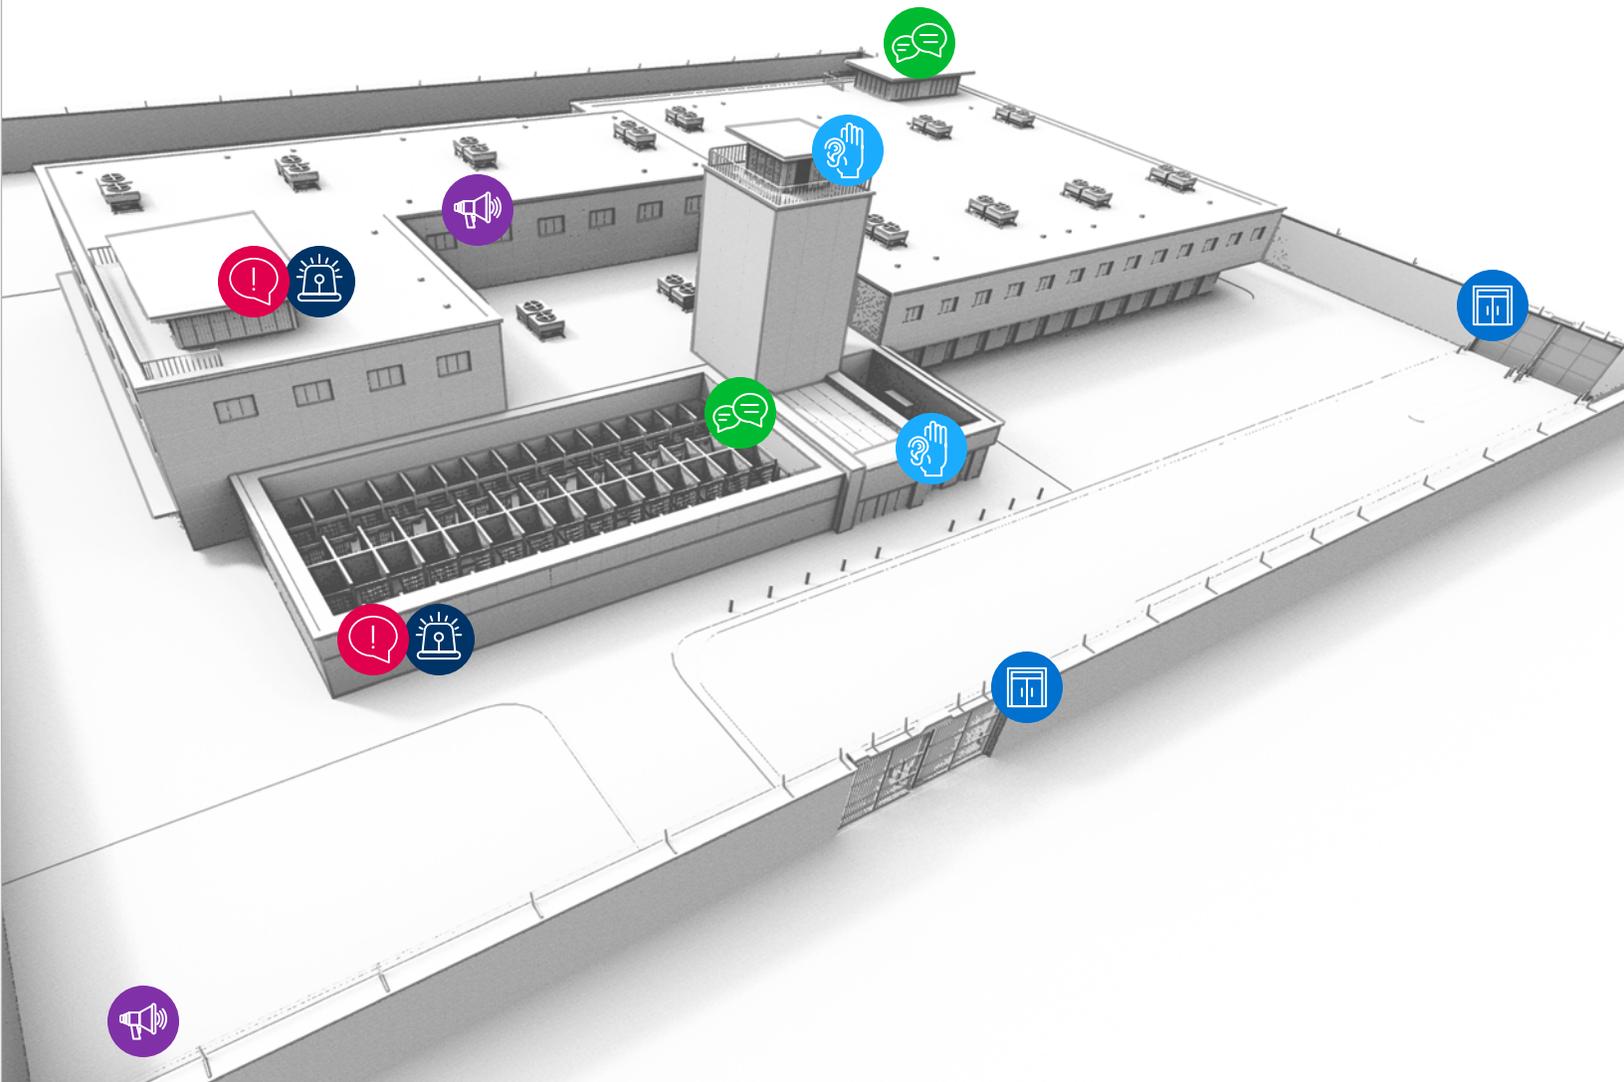

PENITENTIARIES | JAILS | DETENTION CENTERS

Protecting Those Who Protect Us

Discreetly monitor cell blocks, sally ports, prison yards, or anywhere a call station is installed (via the master station). Listen to activity anywhere an audio station is installed; see and hear what is happening with a video station.

Protect your investment! Many of our call stations are flush-mount and vandal-resistant, making them ideal for environments where inmates could potentially damage the devices. For further protection, many call stations have a compatible lock box as an additional barrier for areas that are locked up after-hours.

FEATURES	 Access Control with Door Stations	 Audio Room Sub Stations	 Wall Boxes, Emergency Towers
	 Master Stations	 Emergency Stations	 PA Systems, VMS Integration

Industry experts protect their buildings and everyone inside with our reliable solutions.

Commercial

Effective security systems depend on reliable equipment that is flexible to fit virtually any need. These building owners selected systems that easily accommodated.

[See Commercial Solution Showcases](#)

Educational

With visitor screening and paging integration, these school intercom solutions helped provide a safer learning environment for students and staff.

[See Educational Solution Showcases](#)

Multi-Tenant

From old brownstones to modern rises, our multi-tenant system scenarios included mobile integrations for enhanced security.

[See Multi-Tenant Solution](#)

Healthcare

Going beyond staff alerts, admins in these healthcare settings needed better methods of communication inside and outside their facilities.

[See Healthcare Solution Showcases](#)

Houses of Worship

Churches, synagogues, temples, mosques, and other houses of worship have recently become a target for threats. To help overcome this surge of violence, these congregations selected our security systems.

AIPHONE SOLUTION SHOWCASE

Adding Security and Communication to an Apartment Complex

THE SCENARIO
A community in a large multi-building apartment complex required a video system to provide better a building of multi-unit buildings had a main point of entry and 52 separate apartments. To meet the security requirements, all units needed the ability to view outside and speak into them before anyone enters.

THE SOLUTION
All 14 buildings were outfitted with an IP multi-tenant video intercom, which guest received and change password a one-way to identify visitors prior to unlocking the entrance.

THE SCENARIO
The association in charge of security wanted needed, to be able to add the footage in their intercom building. They also wanted each tenant to have an intercom video system to receive calls from their building's main entrance. This would also allow for the same more secure building even if they were not at home.

THE SOLUTION
The association selected an IP multi-tenant video intercom that offered their tenants security and convenience.

AIPHONE SOLUTION SHOWCASE

Adding Security and Communication to an Elementary School

THE SCENARIO
Administrators of a large elementary school needed a state-of-the-art video system to receive their building's security. After consulting with the school's security committee, administrators decided to use their Aiphone intercom technology that would provide more features to keep their school more secure.

THE SOLUTION
To ensure proper compliance and enough operations, multiple protocols were enabled, administrators could identify any mobile app, visitors could use the software's digital identity map browser without needing a mobile app.

By integrating access control with an IP video intercom, the school had the most in-demand security features to help keep students safe.

Refer to our real-world solution showcases to learn how security challenges were solved with our intercom and access control systems.
